

Waire™ P2 Mask

4 Pack

SR63037

A Class P2 particulate respirator is used to protect against mechanically and thermally generated particulates (dust, mists, and fumes). It is the responsibility of the user to ensure the suitability of this respirator for the application.

The WAIRE™ P2 respirator mask must be fitted and adjusted correctly to your face to provide the intended protection. (4 x Single-use masks)

- WAIRE™ P2 can also be used in certain applications against some bio-aerosols, such as COVID and FLU virus. Helps protect against airborne biological particles - Fluid resistant (120 mm Hg synthetic blood resistance)
- Lightweight construction for added comfort that may increase wearer time. Has a 4-point head harness for a secure and comfortable fit
- Nose wire allows the wearer to shape to the nose, reducing eyewear fogging and forming a better seal.
- Made from Lanaco HELIX™ Advanced Filter Material for effective filtration with low breathing resistance (104Pa @ 95l/m)
- Does not contain components made from natural rubber latex
- Protects against hazards, such as dust, mists, smoke and fumes
- Certified to AS/NZS 1716 (click to read certificate) and Complies with AS/NZS 1716:2012 standard and approved at a P2 level
- Exceeds 95% filtration efficiency in laboratory testing when tested at 95 L/min against a salt aerosol (VicLab Australia, INSPEC United Kingdom)
- Advanced wool hybrid electrostatic filter media - low breathing resistance, moisture-wicking and naturally bacteriostatic
