This SDS is prepared in accord with the SWA document "Preparation of Safety Data Sheets for Hazardous Chemicals - Code of Practice" (Feb 2016).

SAFETY DATA SHEET

1. Identification of the material and supplier

<u>Names</u>	
Product name	: Finish Rinse Aid - Regular & Lemon Sparkle
SDS no.	: D0100163 v1.1
Formulation #	: Regular: 8020575 V6.0, Lemon:8158869 V5.0
Supplier	: AUSTRALIA RB (Hygiene Home) Australia Pty Ltd ABN: 58 629 549 506 680 George St , Sydney, NSW 2000 Tel: +61 (0)2 9857 2000
	NEW ZEALAND RB (Hygiene Home) New Zealand Limited Company number: 7097753 2 Fred Thomas Drive, Takapuna Auckland , New Zealand 0622 Tel: +64 9 484 1400
Poison Information contact:	: Australia - 13 11 26 New Zealand - 0800 764 766 or 0800 POISON
Material uses	: Detergent for use in domestic automatic dishwashers
Product use	: Consumer

Section 2. Hazard(s) identification

Date of issue	: 04/03/2019	Page: 1/10
Prevention	Wear eye or face protection. Avoid contact with skin and eyes.	
General	Keep out of reach of children. If medical advice is needed, have proc or label at hand.	duct container
Precautionary statements		
Hazard statements	Causes serious eye irritation.	
Signal word	WARNING	
GHS label elements Hazard pictograms		
HSNO Classification	6.4A	
Classification of the substance or mixture	SERIOUS EYE DAMAGE/EYE IRRITATION - Category 2A	

Section 2. Hazard(s) identification

Response	 Do not Swallow. If swallowed, do not induce vomiting, give 2 glasses of water to drink. In case of contact with eyes or skin, rinse immediately with plenty of water. If eye irritation persists: Get medical advice.
Storage	: Not applicable.
Disposal	: Not applicable.
Supplemental label elements	: Not applicable.

result in classification

Other hazards which do not : Do not ingest. If product is ingested then seek medical advice.

Section 3. Composition and ingredient information

Substance/mixture

: Mixture

Ingredient name	% (w/w)	CAS number
Oxirane, methyl-, polymer with oxirane, monoisotridecyl ether, block sodium p-cumenesulphonate Acetic acid, zinc salt, hydrate (2:1:2)	-	196823-11-7 15763-76-5 5970-45-6

Other Non-hazardous ingredients to 100%

Occupational exposure limits, if available, are listed in Section 8.

Section 4. First aid measures

Description of necessary first aid measures

Eye contact	: Immediately flush eyes with plenty of water, occasionally lifting the upper and lower eyelids. Check for and remove any contact lenses. Continue to rinse for at least 10 minutes. Get medical attention.
Inhalation	: Remove victim to fresh air and keep at rest in a position comfortable for breathing. If not breathing, if breathing is irregular or if respiratory arrest occurs, provide artificial respiration or oxygen by trained personnel. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation. Get medical attention if adverse health effects persist or are severe. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.
Skin contact	 Flush contaminated skin with plenty of water. Remove contaminated clothing and shoes. Get medical attention if symptoms occur. Wash clothing before reuse. Clean shoes thoroughly before reuse.
Ingestion	: Wash out mouth with water. Remove dentures if any. Remove victim to fresh air and keep at rest in a position comfortable for breathing. If material has been swallowed and the exposed person is conscious, give small quantities of water to drink. Stop if the exposed person feels sick as vomiting may be dangerous. Do not induce vomiting unless directed to do so by medical personnel. If vomiting occurs, the head should be kept low so that vomit does not enter the lungs. Get medical attention if adverse health effects persist or are severe. Never give anything by mouth to an unconscious person. If unconscious, place in recovery position and get medical attention immediately. Maintain an open airway. Loosen tight clothing such as a collar, tie, belt or waistband.

Most important symptoms/effects, acute and delayed				
Potential acute healt	<u>h effects</u>			
Eye contact	: Causes serious eye irritation.			
Inhalation	: No known significant effects or critical hazards.			
Skin contact	: No known significant effects or critical hazards.			
Ingestion	: No known significant effects or critical hazards.			
Over-exposure signs/symptoms				
Date of issue	: 04/03/2019	Page: 2/10		

Section 4. First aid measures

Eye contact	: Adverse symptoms may include the following: pain or irritation watering redness	
Inhalation	: No specific data.	
Skin contact	: No specific data.	
Ingestion	: No specific data.	
Indication of immediate medical attention and special treatment needed, if necessary		
Notes to physician	 Treat symptomatically. Contact poison treatment specialist immediately if large quantities have been ingested or inhaled. 	
Specific treatments	: No specific treatment.	
Protection of first-aiders	: No action shall be taken involving any personal risk or without suitable training. It may be dangerous to the person providing aid to give mouth-to-mouth resuscitation.	

See toxicological information (Section 11)

Section 5. Firefighting measures				
Extinguishing media Suitable extinguishing media	: Use an extinguishing agent suitable for the surrounding fire.			

Unsuitable extinguishing media	: None known.
Specific hazards arising from the chemical	: In a fire, hazardous decomposition products may be produced.
Hazardous thermal decomposition products	: Decomposition products may include the following materials: carbon dioxide carbon monoxide sulfur oxides metal oxide/oxides
Special protective actions for fire-fighters	: Promptly isolate the scene by removing all persons from the vicinity of the incident if there is a fire. No action shall be taken involving any personal risk or without suitable training.

Special protective equipment for fire-fighters should wear appropriate protective equipment and self-contained breathing apparatus (SCBA) with a full face-piece operated in positive pressure mode.

Hazchem code

Section 6. Accidental release measures

Demonstrations, must a	<u>.</u>	
Personal precautions, protective equipment and emergency procedures		
For non-emergency personnel	:	No action shall be taken involving any personal risk or without suitable training. Evacuate surrounding areas. Keep unnecessary and unprotected personnel from entering. Do not touch or walk through spilt material. Avoid breathing vapour or mist. Provide adequate ventilation. Wear appropriate respirator when ventilation is inadequate. Put on appropriate personal protective equipment.
For emergency responders	:	If specialised clothing is required to deal with the spillage, take note of any information in Section 8 on suitable and unsuitable materials. See also the information in "For non-emergency personnel".
Environmental precautions	:	Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers. Inform the relevant authorities if the product has caused environmental pollution (sewers, waterways, soil or air).

Section 6. Accidental release measures

Methods and material for containment and cleaning up

Small spill	: Stop leak if without risk. Move containers from spill area. Dilute with water and mop up if water-soluble. Alternatively, or if water-insoluble, absorb with an inert dry material and place in an appropriate waste disposal container. Dispose of via a licensed waste disposal contractor.
Large spill	: Stop leak if without risk. Move containers from spill area. Approach the release from upwind. Prevent entry into sewers, water courses, basements or confined areas. Wash spillages into an effluent treatment plant or proceed as follows. Contain and collect spillage with non-combustible, absorbent material e.g. sand, earth, vermiculite or diatomaceous earth and place in container for disposal according to local regulations (see Section 13). Dispose of via a licensed waste disposal contractor. Contaminated absorbent material may pose the same hazard as the spilt product. Note: see Section 1 for emergency contact information and Section 13 for waste disposal.

See Section 1 for emergency contact information.

See Section 8 for information on appropriate personal protective equipment. See Section 13 for additional waste treatment information.

Section 7. Handling and storage

Precautions for safe handling			
Protective measures	:	Put on appropriate personal protective equipment (see Section 8). Do not ingest. Avoid contact with eyes, skin and clothing. Avoid breathing vapour or mist. Keep in the original container or an approved alternative made from a compatible material, kept tightly closed when not in use. Empty containers retain product residue and can be hazardous. Do not reuse container.	
Advice on general occupational hygiene	:	Eating, drinking and smoking should be prohibited in areas where this material is handled, stored and processed. Workers should wash hands and face before eating, drinking and smoking. Remove contaminated clothing and protective equipment before entering eating areas. See also Section 8 for additional information on hygiene measures.	
Conditions for safe storage, including any incompatibilities	:	Store between the following temperatures: 5 to 30°C (41 to 86°F). Store in accordance with local regulations. Store in original container protected from direct sunlight in a dry, cool and well-ventilated area, away from incompatible materials (see Section 10) and food and drink. Keep container tightly closed and sealed until ready for use. Containers that have been opened must be carefully resealed and kept upright to prevent leakage. Do not store in unlabelled containers. Use appropriate containment to avoid environmental contamination.	

Section 8. Exposure controls and personal protection

Control parameters	
<u>Australia</u>	
Occupational exposure limits	
None.	
New Zealand	
Occupational exposure limits	: No exposure standard allocated.
Appropriate engineering controls	: Good general ventilation should be sufficient to control worker exposure to airborne contaminants.
Environmental exposure controls	: Emissions from ventilation or work process equipment should be checked to ensure they comply with the requirements of environmental protection legislation. In some cases, fume scrubbers, filters or engineering modifications to the process equipment will be necessary to reduce emissions to acceptable levels.

Individua	protection	measures

Date of issue	: 04/03/2019	Page: 4/10
---------------	--------------	------------

Section 8. Exposure controls and personal protection

Hygiene measures	: Wash hands, forearms and face thoroughly after handling chemical products, before eating, smoking and using the lavatory and at the end of the working period. Appropriate techniques should be used to remove potentially contaminated clothing. Wash contaminated clothing before reusing. Ensure that eyewash stations and safety showers are close to the workstation location.
Eye/face protection	: Safety eyewear complying with an approved standard should be used when a risk assessment indicates this is necessary to avoid exposure to liquid splashes, mists, gases or dusts. If contact is possible, the following protection should be worn, unless the assessment indicates a higher degree of protection: chemical splash goggles.
Skin protection	
Hand protection	: Chemical-resistant, impervious gloves complying with an approved standard should be worn at all times when handling chemical products if a risk assessment indicates this is necessary. Considering the parameters specified by the glove manufacturer, check during use that the gloves are still retaining their protective properties. It should be noted that the time to breakthrough for any glove material may be different for different glove manufacturers. In the case of mixtures, consisting of several substances, the protection time of the gloves cannot be accurately estimated.
Body protection	 Personal protective equipment for the body should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Other skin protection	 Appropriate footwear and any additional skin protection measures should be selected based on the task being performed and the risks involved and should be approved by a specialist before handling this product.
Respiratory protection	: Based on the hazard and potential for exposure, select a respirator that meets the appropriate standard or certification. Respirators must be used according to a respiratory protection program to ensure proper fitting, training, and other important aspects of use.

Section 9. Physical and chemical properties

<u>Appearance</u>			
Physical state	:	Liquid.	
Colour	:	Blue.	
		Yellow.	
Odour	1	Odourless; lemon like scent	
Odour threshold	1	Not available.	
рН	1	2.8 to 3.2 [Conc. (% w/w): 100%] [20°C]	
Melting point	:	Not available.	
Boiling point	:	100°C (212°F)	
Flash point	:	Not available.	
Evaporation rate	:	Not available.	
Flammability (solid, gas)	:	Not available.	
Lower and upper explosive (flammable) limits	1	Not available.	
Vapour pressure	:	Not available.	
Vapour density	:	Not available.	
Relative density	:	Not available.	
Solubility	:	Easily soluble in the following materials: cold water and hot water.	
Solubility in water	:	Easily soluble in the following materials: Hot water and Cold Water.	
Partition coefficient: n- octanol/water	:	Not available.	
Auto-ignition temperature	:	Not available.	
Decomposition temperature	:	Not available.	
Viscosity	:	Not available.	
Date of issue		: 04/03/2019	Page: 5/10

Section 9. Physical and chemical properties

Flow time (ISO 2431) : Not available.

Section 10. Stability and reactivity

Reactivity	: No specific test data related to reactivity available for this product or its ingredients.
Chemical stability	: The product is stable.
Possibility of hazardous reactions	: Under normal conditions of storage and use, hazardous reactions will not occur.
Conditions to avoid	: No specific data.
Incompatible materials	: No specific data.
Hazardous decomposition products	: Under normal conditions of storage and use, hazardous decomposition products should not be produced.

Section 11. Toxicological information

Information on toxicological effects

Acute toxicity

Product/ingredient name	Result	Species	Dose	Exposure
Acetic acid, zinc salt, hydrate (2:1:2)	LD50 Oral	Rat	794 mg/kg	-
sodium cumenesulphonate	LD50 Dermal LD50 Oral	Rat Rat	2000 mg/kg 7000 mg/kg	-

Conclusion/Summary

: Based on available data, the classification criteria are not met.

Irritation/Corrosion

Product/ingredient name	Result	Species	Score	Exposure	Observation
Acetic acid, zinc salt, hydrate (2:1:2)	Eyes - Moderate irritant	Rabbit	-	24 hours 20 milligrams	-
	Skin - Mild irritant	Rabbit	-	24 hours 500 milligrams	-

Conclusion/Summary

Skin Eyes Beenimtenv	 Based on available data, the classification criteria are not met. Based on Calculation method: Causes serious eye irritation.
Respiratory Sensitisation Not available.	: Based on available data, the classification criteria are not met.
Conclusion/Summary	
Skin	: Based on available data, the classification criteria are not met.
Respiratory <u>Mutagenicity</u> Not available.	: Based on available data, the classification criteria are not met.
Conclusion/Summary Carcinogenicity Not available.	: Based on available data, the classification criteria are not met.
Conclusion/Summary <u>Reproductive toxicity</u>	: Based on available data, the classification criteria are not met.

Date of issue

Section 11. Toxicological information

Not available.

Conclusion/Summary	Based on available data, the classification criteria are not met.
Teratogenicity	
Not available.	

Conclusion/Summary : Based on available data, the classification criteria are not met.

Specific target organ toxicity (single exposure)

Not available.

<u>Specific target organ toxicity (repeated exposure)</u> Not available.

Aspiration hazard

Not available.

Information on likely routes : Not available. of exposure

Potential acute health effects

Eye contact	: Causes serious eye irritation.
Inhalation	: No known significant effects or critical hazards.
Skin contact	: No known significant effects or critical hazards.
Ingestion	: No known significant effects or critical hazards.

Symptoms related to the physical, chemical and toxicological characteristics

Eye contact	: Adverse symptoms may include the following: pain or irritation watering redness
Inhalation	: No specific data.
Skin contact	: No specific data.
Ingestion	: No specific data.

Delayed and immediate effects as well as chronic effects from short and long-term exposure			
Short term exposure			
Potential immediate effects	1	Not available.	
Potential delayed effects	:	Not available.	
Long term exposure			
Potential immediate effects	1	Not available.	
Potential delayed effects	:	Not available.	
Potential chronic health effects			
Not available.			
Conclusion/Summary	:	Based on available data, the classification criteria are not met.	
General	:	No known significant effects or critical hazards.	
Carcinogenicity	1	No known significant effects or critical hazards.	
Mutagenicity	1	No known significant effects or critical hazards.	
Teratogenicity	1	No known significant effects or critical hazards.	
Developmental effects	1	No known significant effects or critical hazards.	
Fertility effects	1	No known significant effects or critical hazards.	

Date of issue

Toxicity

Section 11. Toxicological information

Numerical measures of toxicity

Acute toxicity estimates		
Route	ATE value	
Dermal	29629.6 mg/kg	

Section 12. Ecological information

Product/ingredient name	Result	Species	Exposure
Acetic acid, zinc salt, hydrate (2:1:2)	Acute LC50 0.55 mg/l Fresh water	Fish - Oncorhyncus mykiss	96 hours
sodium cumenesulphonate	Acute EC50 230 mg/l	Algae - Pseudokirchnerella subcapitata	96 hours
	Acute EC50 54 mg/l	Daphnia - Daphnia magna, mobility	48 hours
	Acute LC50 1000 mg/l	Fish - Óncorhynchus mykiss	96 hours

Persistence and degradability

Conclusion/Summary : Based on available data, the classification criteria are not met.

Bioaccumulative potential

Not available.

Mobility in soil Soil/water partition : Not available. coefficient (Koc) : Not available.

Other adverse effects

: No known significant effects or critical hazards.

Section 13. Disposal considerations

Disposal methods	: The generation of waste should be avoided or minimised wherever possible. Disposal of this product, solutions and any by-products should at all times comply with the requirements of environmental protection and waste disposal legislation and any regional local authority requirements. Dispose of surplus and non- recyclable products via a licensed waste disposal contractor. Waste should not be disposed of untreated to the sewer unless fully compliant with the requirements of all authorities with jurisdiction. Waste packaging should be recycled. Incineration or landfill should only be considered when recycling is not feasible. This material and its container must be disposed of in a safe way. Care should be taken when handling emptied containers that have not been cleaned or rinsed out. Empty containers or liners may retain some product residues. Avoid dispersal of spilt
	containers or liners may retain some product residues. Avoid dispersal of spilt material and runoff and contact with soil, waterways, drains and sewers.

14. Transport information

14. Transport information						
Regulation	UN number	Proper shipping name	Classes	PG*	Label	Additional information
ADG	Not Regulated.	Not applicable.	Not available.	-		-
IMDG	Not Regulated.	Not applicable.	Not available.	-		-
ΙΑΤΑ	Not Regulated.	Not applicable.	Not available.	-		-

PG* : Packing group

Special precautions for user : Transport within user's premises: always transport in closed containers that are upright and secure. Ensure that persons transporting the product know what to do in the event of an accident or spillage.

Section 15. Regulatory information

Standard Uniform Schedule of Medicine and Poisons				
Not scheduled				
Model Work Health and Safety Regulations - Scheduled Substances				
No listed substance				
Australia inventory (AICS)	: All components are listed or exempted.			
New Zealand Inventory of Chemicals (NZIoC)	: All components are listed or exempted.			
HSNO Group Standard	: Cleaning Products (Subsidiary Hazard)			
HSNO Approval Number	: HSR002530			
Approved Handler Requirement	: No.			
Tracking Requirement	: No.			

Section 16. Any other relevant information

Key to abbreviations	: ADG = Australian Dangerous Goods ATE = Acute Toxicity Estimate BCF = Bioconcentration Factor GHS = Globally Harmonized System of Classification and Labelling of Chemicals IATA = International Air Transport Association IBC = Internediate Bulk Container IMDG = International Maritime Dangerous Goods LogPow = logarithm of the octanol/water partition coefficient MARPOL = International Convention for the Prevention of Pollution From Ships, 1973 as modified by the Protocol of 1978. ("Marpol" = marine pollution) NOHSC = National Occupational Health and Safety Commission SUSMP = Standard Uniform Schedule of Medicine and Poisons UN = United Nations
Date of issue / Date of revision	: 04/03/2019
Revision comments	: No previous validation
